With older or more complex pronunciation elements could also be better to choose one thing and work on that. As soon as you start to make an automatic element in your speech, you will see what is clearer you become with your accent in English. The reason is that the mouth can get used to moving in a new way. 2) People å Ć Listen å "" Sometimes people tell me that she always listens to British native speakers, but their speech is nothing clear "" you have to imitate them exactly and pretend to speak like them. You have to do this a lot. Å Ć å Ć œQual are the larger mistakes that people do when they try to reduce their accent in English? Å Ć å Ć å Ć I listed about 4 for him. If I take some examples from the words above: the non-vocal consonants with / s / s / after it is necessary to practice consonants / t / and / s / together Å Ć å Ć å Ć å Ć å Ć "make a list Of words with this combination and practice until you feel smooth and easier. 1) people often do not know what to change, and how to change it to be clearer in English people often do a great job by changing more obvious things to speak English more clearly but then they don't know what to do after. It is more efficient to choose one or two elements and work on these until they are automatic, and then switch to something else. Il terzo motivoÅ significa che devi esercitarti a dire le 2 consonanti insieme in modo da ÅÅ lasciare /s/ e /z/ fuori perchÅ© la tua bocca Å "Ånon abituata a muoverti in questo modo. Often this happens because it is difficult to Å Ć å Ć å Ć å Ć " å Ć "" and what errors you are doing as you Ć å Ć "" Å "" automatically because you speak that way. Write a note and put it where you can see it to remind you of practicing. You have to practice remind you to use it when you talk! Å , because I should do this you could ask? Of to reduce your accent in English and to have people you the first time you say something. Pronounce the eÅÅeseÅÅÅ as /ÅÅz/after the consonants /s /z/ eÅÅAchÅÅÅ eÅÅÅshÅÅÅ eÅÅÅjÅÅÅ eÅÅÅzhÅÅÅ (as in vision)- (in eÅÅÅeseÅÅÅ /ÅÅz/, the schwa sound /ÅÅ/ is said like a very short eÅÅÅucÅÅÅ sound) e.g., passes, beaches, washes, packages, noses. Another area that is more complex isÅ Åstress patterning in English. To change an accent you need to listenÅ Åand repeatÅ Åafter the listener. e.g, cats, lots, bats, rates, experts, apartments, etc You can do the same with the other ones eÅÅÅÅ ÅpsÅ Å(tops or the verb, stops),Å ÅksÅ Å(back),Å ÅfsÅ Å(this one is usually only for the verb eÅÅÅ laughs coughs etc),Å ÅthsÅ Å(baths) Voiced consonants with eÅÅÅscÅÅÅ said as /z/ after it- This combination is sometimes a bit harder for people to pronounce, so keep practicing and it will get easier. So you may want to chose one vowel to work on till it is automatic in your speech and then move on. The other thing to remember is to pay attention when listening to native English speakers and the audio trainer in my program, and remember how they use it. I also offerÅ Å pronunciation assessments as well Å Å -Ask a native English speaking person to listen and tell you what they notice you need to work on. 4) People doneÅÅÅt consciously use their new English pronunciation in everyday situations Once you have mastered a particular pronunciation or speech element then iteÅÅÅs time to use it in the outside world! I have worked with people who have mastered an element of their accent in English when they are practicing by themselves or with me, but then doneÅÅÅt feel comfortable using it in the outside world. This of course is important in speaking English more smoothly and flowing. 3) People doneÅÅÅt spend long enough on each element for clearer pronunciation If you try to work on everything at once, often none of it becomes automatic in everyday speech in English.
